

UNITED STATES DEPARTMENT OF AGRICULTURE
FOREST SERVICE

ADDRESS REPLY TO
THE FORESTER
AND REFER TO

WASHINGTON

EM (G)
Maps, Lincoln
Geographic Names

January 10, 1927.

Secretary,

United States Geographic Board.

Dear Mr. McCormick:

The enclosed copy of a letter received by the Forester from our District Forester at Albuquerque is self-explanatory. I also enclose the map showing the exact location of the present Sierra Blanca Peak.

The District Forester alludes to the fact that "there is a multiplicity of White Mountains all over the United States." It might be said with even greater force that there is more than a multiplicity of Lincoln Peaks in every part of the United States -- a fact which, as I recall, was brought out very clearly at the time the G.A.R. officials appeared before the Board and urged the name of Lincoln to replace that of Rainier on the peak in Washington.

I will be glad to have this matter looked into by a reference to any state board of geographic names which may exist in New Mexico, and placed before the Board for action at a future meeting.

Very sincerely yours,

Wm. J. James
Assistant Forester.

Enclosures.
